G-Rex[®] Grant Program

Accelerate Your Cell & Gene Therapy!

Empowering CGT Manufacturers with Resources and Expertise

The G-Rex[®] Grant Program is a \$20 million initiative by ScaleReady, Wilson Wolf Manufacturing, Bio-Techne, and CellReady, that is designed to propel the advancement of cell and gene therapies (CGT).

If you're engaged in pre-clinical research, process development, or cGMP manufacturing of cell and gene-modified cell therapies, this program is for you!

Who can benefit?

- Anyone trying to advance a CGT manufacturing program:
 - Commercial Entities
 - R&D, Process Development, GMP manufacturing, and more
 - Academic Institutions
 - Principal Investigators, R&D, clinical manufacturing and more

What you'll receive:

- \$5,000 to \$300,000 of best-in-class products including:
 - G-Rex® "M" series bioreactors and GatheRex
 - Specialty reagents designed for G-Rex® including:
 - Media (Animal Free, T-cell, NK)
 - GMP cytokines (IL-7, IL15, IL-2, IL-21)
 - TcBuster
- Unlimited expert consulting services at zero cost, including:
 - Batch record review and optimization
 - Guidance from highly experienced personnel including former FDA and EMA CMC reviewers
 - Technical application support
 - CGT business and operational efficiency consulting based on years of experience

Benefits:

- Proven path to highly efficient, high-throughput manufacturing operations
- Lean business models that stretch your investors' capital
- Streamlined and mistake-free transition from research labs to GMP manufacturing
- Clinically scalable manufacturing transfer from academia to the private sector

Get on board:

G-Rex has now advanced into nearly 50% of clinical trials and several commercially approved drugs!
